Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continuation of Attachment(s) 6). Other: marked up copy of the sheet of drawings of Santucci.

DETAILED ACTION

Drawings

1. The drawings are objected to because the lines, numbers and letters are not uniformly thick and well defined. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: a period should replace the semi-colon at the end of paragraph [0007].

Appropriate correction is required.

Claim Objections

3. Claims 1 and 6 are objected to because of the following informalities: in claim 1, line 9 –be- should be inserted after “baseplate will”; in claim 1, lines 16 and 21 “said upper side” has no clear antecedent; in claim 6, line 1 “to” should be deleted; in claim 6, line 13 –be- should be inserted after “baseplate will” and in claim 6, lines 20 and 24, “said upper side” has no clear antecedent. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Santucci.

See the attached marked up copy of figure 4 of Santucci which shows what is considered to be the kit, the bulkhead, the mission module and the deck. Figure 2 shows the kit with the cover being 26 and the u channel being 24. The base is 28, the walls are 30, the slot is 36, the divider is 84, the monolithic flange is 82, and the second thickness is 86. The utilities are 76.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3617

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Santucci.

Santucci does not disclose a second slot and second divider. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to provide a second slot and divider in order to divide the channel interior into three spaces as opposed to two. A better division of the utility lines 76 will result.
